National Covid-19 Task Force

NC19TF/01/ 294

30th April 2021

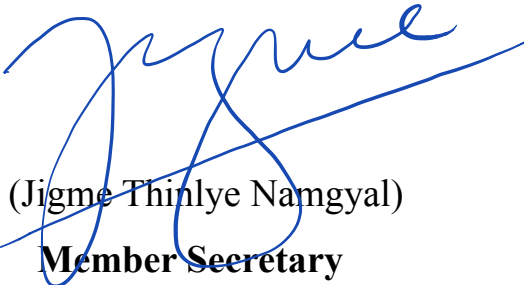

Notification

The COVID-19 situation is worsening world over, and more cases are being recorded daily at the quarantine facilities back home. The risk of the disease transmission is increasing by the hour.

However, it is noticed that routine official meetings and training are being held, with many of them spilling over to the adjacent Dzongkhags. In the event of a local infection, such meetings and gatherings will magnify the spread of the disease.

Therefore, the NC19TF urges all to resort to online meetings and communications. If unavoidable, only essential meetings with minimum participants can be organised at a venue. The head of agency will approve the meetings following thorough scrutiny.

The taskforce would like to remind that if the advisory is not given serious consideration, a moratorium on all meetings and training will be enforced.
