Dzongkha Keyboard and dz-BT locale in Windows 10

Microsoft added the Dzongkha keyboard Layout and the dz-BT Locale in their latest OS Windows 10, which was launched on 29th July, 2015. The official Dzongkha keyboard layout and the dz-BT were provided to the Microsoft by the Dzongkha Development Commission.

Unlike in earlier versions of Windows, users will no more have to install the Dzongkha keyboard and the locale separately.
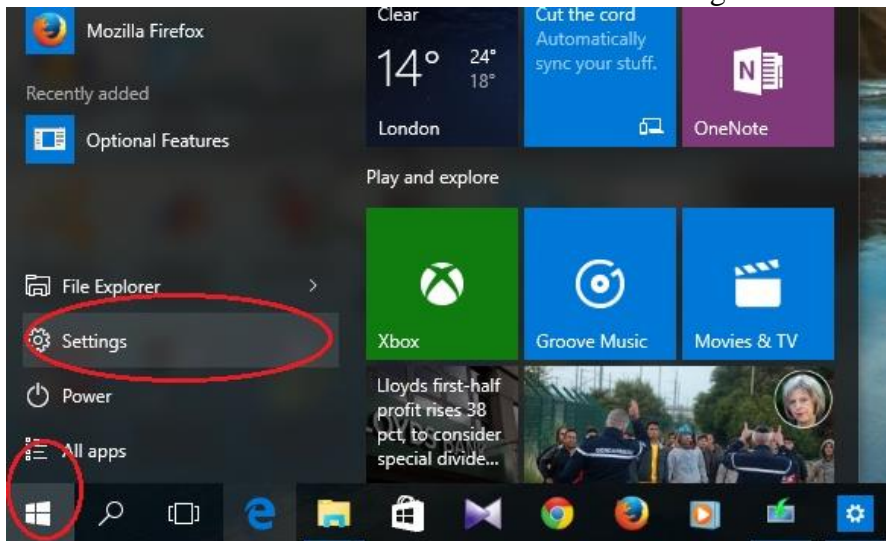

The users will now be able to add Dzongkha as a language with official Dzongkha keyboard. Text typed in Dzongkha will now be tagged as Dzongkha text unlike as Tibetan in Windows 7 and 8 and Iscelandic in Windows XP.

With dz-BT locale included, the users now will be able to change the formats of date and time, numbers and currency.
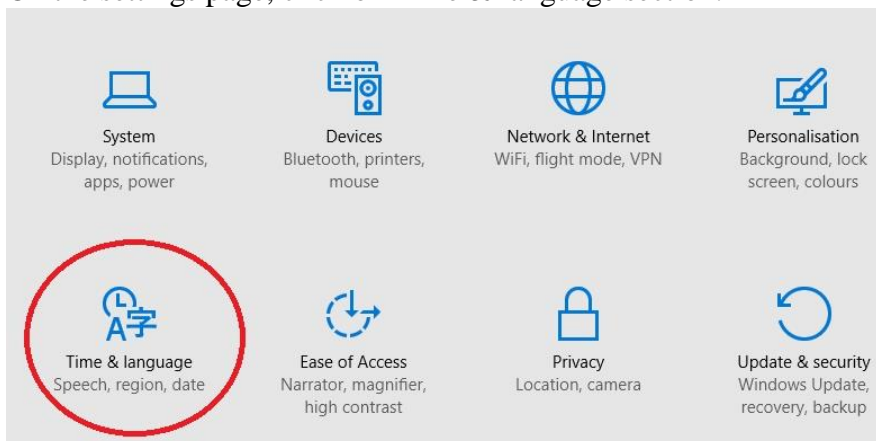

How to add the Dzongkha language and Dzongkha keyboard

Uninstall the Dzongkha keyboard if you have installed it before upgrading to Windows 10 and follow the following steps to add Dzongkha keyboard on your computer.
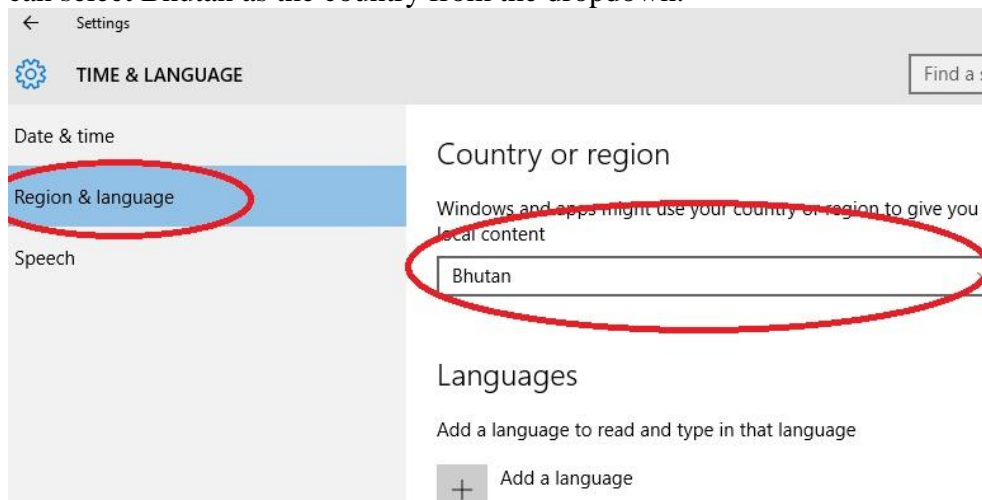

1. Click on the windows start menu and then on the settings.

2. On the settings page, click on Time & language section.

3. Once you are on Time and Language page, click on Region & language menu. You can select Bhutan as the country from the dropdown.

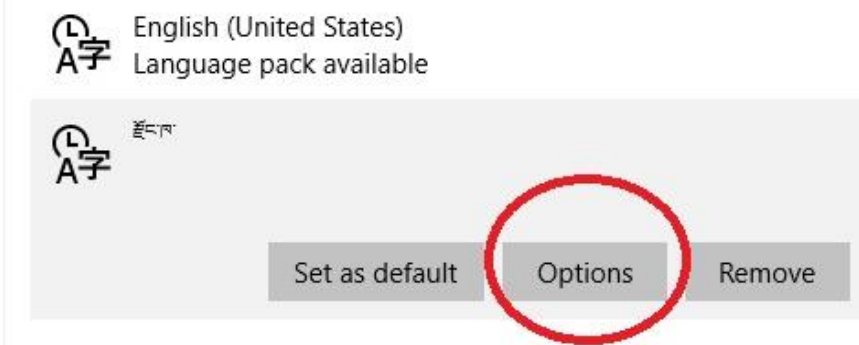

4. Next click on + button to add a language.

5. Scroll through the list to find Dzongkha and click on it to add it.

6. Next click on Options button to be able to add the Dzongkha keyboard.
