Installation of Dzongkha on Android 4.x (Jelly Bean) and above

The PDF version of the manual is downloadable from the end of this instruction page.

The DDC is working to get Dzongkha support included in the Android operating system. Until then you can root the phone (Samsung phones are not required to root any more) and install Dzongkha font and keyboard on Android Jelly Bean. (4.x)and above. Earlier versions of Android will not render Dzongkha text correctly (letters will overlap).

I. Rooting Android Phone (Not required for Samsung Phones, skip the step)

To install Dzongkha on your Android phone you require root access. If your Android 4.x phone is not already "rooted" follow the steps below.

Download and Install "Kingo Android Root"

Kingo Android Root is a utility which should enable you to root your Android phone.

Make sure your PC has access to internet.

Download "Kingo Android Root" on your computer from here.

Run the downloaded file, follow the instructions illustrated in the screenshots below to install the software on your computer.

Right click and open the file

5	Open	
. 8	Run as administrator	
890	Troubleshoot compatibility	
	7-Zip	- 8
9	Scan android_root.exe	
ø	Move to Dropbox	
	Share with	
30	TeraCopy	
	Pin to Taskbar	
	Pin to Start Menu	
20	Scan with Malwarebytes' Anti-Malware	
R	Unlocker	
	Restore previous versions	
	Adobe Drive CS4	ġ
	Send to	- 21
2	Cut	
	Сору	
	Paste	
	Create shortcut	
	Delete	
	Rename	
	Bronatias	

www.dzongkha.gov.bt/en/article/installation-of-dzongkha-on-android-4-x-jelly-bean-and-above

Follow the successive steps illustrated in the following screenshots to install "Kingo Android Root".

www.dzongkha.gov.bt/en/article/installation-of-dzongkha-on-android-4-x-jelly-bean-and-above

Click on "Finish" once the installation is complete.

You have now successfully installed "Kingo Android Root" on your computer.

Connecting the Phone to the Computer

connect your phone to the computer, enable USB debugging mode on your phone from "Settings". Enabling USB Debugging mode differs from one Android version to another.

You should also have the mobile synchronizing PC suite from your phone manufacturer installed on your computer to synchronize between the phone and the computer. The PC suite also differs from one mobile brand to another. (Example: for Samsung, use Samsung Kies).

Now, open the "Kingo Android Root" shortcut icon created on your computer Desktop.

Connect the phone to your computer via USB cable that comes along with the phone.

"The Kingo Android Root" will automatically detect and recognize the phone. Then click on "ROOT" and the rooting procedure will start. It may take seceral minutes to complete the procedure, depending upon the speed of your connection.

Once the rooting procedure is completed, select "FINISH". Your phone will automatically reboot.

Kingo ROOT	About Us	Agree Declamer = - X
Root Su ROOT Succ	cceeded! eeded! Please reboot your device	to make it more stable.
}	_	
-	_	Finish

You can now close the "Kingo Android Root" application and unplug the USB cable to disconnect the phone from the computer.

Install iFont Fonts selector for Android

Installing Dzongkha Dictionaries on Android

Download and Install GoldenDict

Download and install "GoldenDict Free" on your phone from "Play Store"

Dowload, Copy and Install Dictionary Files

Download stardict files from <u>HERE (Dzongkha-Dzongkha, Dzongkha-English & English-Dzongkha)</u> Copy these dictionary files from "Download" folder to your SD card, in the "GoldenDict" folder *Note: Do not copy and paste stardict folders. Copy the files inside the folder (.dict, .idx and .ifo) in the GoldenDict folder.*

Now open GoldenDict Free ► Proceed ► Done (After the indexing is complete)

www.dzongkha.gov.bt/en/article/installation-of-dzongkha-on-android-4-x-jelly-bean-and-above
